Treatment feature of the month

HIFU (High Intensity Focused Ultrasound)

- Smoother, firmer and brighter skin in the months after treatment!

HIFU treatment is the only non-invasive alternative to surgery. Non-invasive ultrasound energy generates low levels of heat in the targeted skin. This stimulates the cells for collagen production and tissue rejuvenation. It is FDA-approved to lift the skin on the face and neck. Common treatment areas include brows, forehead, chin neck and eye area. If you don't think you need surgery yet, HIFU may be the natural facelift or neck lift alternative for you. Smoother, firmer and brighter skin in the months after treatment!

BIO Light *Buy 2 Get 1 free!

-The unique combination with dual effects!

The BIO generates low current mimicking the current of the skin to heal, restore and repair the cells, enhancing their permeability. The combined effect of micro current and LED light creates a much more pronounced rejuvenation of the skin, healing it from inside as well as outside. It helps to tighten the skin, refine wrinkles and restore and regenerate the formation of endogenous collagen in the skin. We recommend a course of 6 treatments once a week for the first 6 weeks.

Look Younger skin in 6 weeks \$999

LiLash

-Enhance your Eyelashes with LiLash Conditioning Serum!

LiLash will simplify your daily beauty routine. You will need fewer coats of mascara and less mascara will produce greater length, curl, and separation. Additionally, people who use extensions experience less natural lash breakage and greater follicle support, allowing them to enjoy their extensions for longer.

Formulated by a cosmetic surgeon, the priority is safety and efficacy. The serum is ophthalmologist tested and is safe for all to enjoy. The safety extends to those with sensitive eyes and contact lens wearers. We never test on animals and our products are paraben free.

Picosecond Focus Laser Skin Toning

Rejuvenate and revitalize the skin!

Picosecond Focus Laser Skin Toning treatment effectively helps to improve sun spots, acne scars, melasma and other conditions that affect the skin's pigmentation. Our laser machine is the world's first, fastest and most effective picosecond aesthetic laser. This unparalleled breakthrough in laser technology delivers ultra-short pulse bursts of energy to the skin in trillionths of a second. Picosecond pulse width is 100 times shorter than nanosecond technology. Traditional nanosecond lasers predominantly rely on photothermal action, delivering heat to the pigment and surrounding tissue. The benefits of Picosecond Focus Laser Skin Toning are highly effective on neck, face, and hands to improve skin's firmness and minimize the appearance of fine lines, wrinkles and pigmentation. Treatment intervals are two to four weeks but can vary according to individual treatment plan.

-Ready to lose your tattoo?

Our IPicosecond laser is the only advanced tattoo removal laser with PressureWave technology, which works with your body to remove unwanted ink. The machine delivers laser energy that specifically targets tattoo ink, resulting in the successful shattering of just the ink particles without harming the surrounding tissue. It works effectively on: Multicolored tattoos (including blues and greens), Hard-to-remove black ink and Stubborn, previously treated tattoos.
